Professional Summary

Computer Science Engineering (Artificial Intelligence) student with hands-on experience in Java, Spring Boot, Spring Data JPA, Hibernate, Spring Security, REST APIs, PostgreSQL, and React. Interested in Java Backend and Full Stack Development, with experience building secure, database-driven full-stack applications.

Education

Parul University — Vadodara, Gujarat
B.Tech in Computer Science Engineering (Artificial Intelligence) – CGPA: 8.28/10 — *Aug. 2023 – Present*

Sri Chaitanya Junior College — Vijayawada, Andhra Pradesh
Intermediate (MPC) – 91% — *Aug. 2021 – May 2023*

Sri Chaitanya School — Andhra Pradesh
SSC (10th Class) – GPA: 10/10 — *2021*

Projects

E-Commerce Website – Full Stack E-Commerce Platform | *Java 17, Spring Boot 3, Spring Security, Spring Data JPA, Hibernate, PostgreSQL, Redis, React 18, Vite*

- Built a full-stack E-Commerce platform with product browsing, live keyword search, category filtering, price sorting, stock indicators, cart, wishlist, coupons, checkout, and order management.
- Implemented secure REST APIs using Spring Security, stateless JWT authentication, BCrypt password hashing, and role-based access control for User and Admin.
- Designed database persistence with Spring Data JPA/Hibernate and PostgreSQL, including relational constraints and transactional order/payment operations; added Redis caching for faster product catalog access.
- Developed Admin Dashboard features for product and inventory management, customer orders, and store operations; integrated SMTP email receipts with order details, totals, product information, and delivery estimates.

FinScan – AI Expense Tracker & Financial Analytics | *Java, Spring Boot, React, PostgreSQL, Gemini AI, Docker*

- Engineered a full-stack personal finance application for automated expense tracking and intelligent budgeting across 500+ simulated transactions.
- Integrated Google Gemini Vision AI to parse receipts and automatically extract merchant, line items, totals, and structured JSON data, reducing manual expense entry time by 85%.
- Built secure RESTful APIs with Spring Boot and Spring Security using stateless JWT authentication, role-based access control, and PostgreSQL ACID transactions.
- Designed a responsive React dashboard with interactive financial analytics using Recharts, dynamic budget threshold alerts, and predictive savings goals; implemented caching and indexing to optimize multi-month expenditure queries.

Technical Skills

Programming: Java, JavaScript, SQL
Java & Backend: Core Java, OOP, Collections, Exception Handling, Java 8, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs
Security: Spring Security, JWT, BCrypt, Role-Based Authorization
Frontend: React, Vite, React Router, Axios, HTML, CSS
Database: PostgreSQL, MySQL
Caching & Integration: Redis, SMTP / Spring Boot Mail
Tools: Git, GitHub, Postman, IntelliJ IDEA, VS Code, Docker
CS Fundamentals: Data Structures & Algorithms, DBMS

Certifications

Java Spring Framework, Spring Boot, Spring AI – GenAI – Telusko Edutech (Instructor: Navin Reddy), Aug. 25, 2026
JavaScript Development – Mindluster

Activities

Active on LeetCode and GitHub; regularly practice Data Structures & Algorithms and Java development.
